- Packaging
- Assembly

ARTSO CORES VICTORIA

The group's largest operations with facilities for the production of cores and mould in cold box and shell. Many various binder systems are utilised to meet the demands of the market. A wide range of production equipment is employed to enable the production of cores and mould for both small and large castings.

Specialist production includes the manufacture of automotive core assemblies and composite cores. Accredited to ISO 9001/2000 the Melbourne operations are the largest commercial core and mould operation in Australia.

ARTSO CORES NEW SOUTH WALES

Established in 2002 following our acquisition of Precision Cores. The business has been redeveloped to a dedicated, high quality core and mould operation. Production capabilities allow for production in the cold box and shell processes.

The Artso Core philosophy has been adopted to ensure that current technology is employed to ensure the ongoing supply of premium quality products at an economical price to our rapidly growing customer base.

The plant operates in line with ISO 9001/2000 quality guidelines and is scheduled to be officially audited in late 2003.
